Cutting Tutorial

What you Need

- Cardstock or Photo Paper
- Scissors
- Ruler
- Cutting Mat
- Hobby Knife or Box Cutter
- Glue Stick
- Marker Pen

Step 1: Print, Cut, Glue and Fold

1. Print your minis onto Cardstock or Photo Paper.
2. Cut out the rows of minis using Scissors.
3. Use your Ruler and Box Cutter to score the red line between the minis.
4. Fold the paper in half.
5. Glue both sides of the paper using a Glue Stick.
6. Press the two halves together and wait until the glue is dry.

Step 2: Cut Out

1. Cut the minis from the row so that each mini is in its own square.

2. Cut each mini out of the its square using a Box Cutter or Hobby Knife.

3. Stab the knife into the black border and pull it.

4. Try to remove all the white paper from the mini.

5. You don't have to remove all the paper with one cut.

6. Continue until each mini is cut out like the second picture.

7. Check the back of the mini occassionally to make sure that your alignment is correct. If your alignment is a little off you can adjust how much of the black border you cut.

8. If it gets difficult to pull the knife, try replacing the tip.

9. Remember not to stab too hard or you will be cutting the mat.

BRAVE ADVENTURES

Step 3: Edge

1. After all the minis are cut out, they are ready to play with, but there is one more step for your minis to look really good.

2. Colour the white edge of each mini with a black marker.

3. For most areas, you can hold the mini with one hand and run the marker tip along the edge with your other hand.

4. For difficult areas, such as between a character's legs, you can put the mini on your cutting mat and colour around the inside of the space. You might have to flip the mini over to get both sides well.

   That's all! Your minis should now be ready to play with.
